PROFESSIONAL SUMMARY

A results-driven Computer Science graduate and current ICT Assistant at the Ministry of Education, where I ensure the stability of critical national education systems. My career bridges hands-on technical support with strategic digital transformation, having led the ICT component of the NGAZI Program to help entrepreneurs integrate technology for growth. I possess practical development skills (React, HTML/CSS, Bootstrap) and foundational database management (SQL/Oracle), complemented by ongoing formal training in Cloud and Network Security. I am eager to apply my experience in troubleshooting, system maintenance, and application development to build scalable solutions that solve real-world problems.

CORE SKILLS

- ICT Support
- Cybersecurity & Network Security
- Software Development: React, HTML, CSS, Bootstrap, and Figma,
- System Administration
- Version Control & Collaboration
- Database Management: Practical knowledge of SQL and Oracle database management systems.
- Technical Writing & Mentoring: Experienced in creating technical content, research articles, and mentoring students in technical writing.
- Networking & Troubleshooting: Hands-on expertise in routing, switching, and diagnosing network issues.

PROFESSIONAL EXPERIENCE

DLP/ICT Assistant

Ministry of Education (October 2025 - Present)

- Provide technical ICT support to various directorates and units within the Ministry of Education
- Assist in the daily operation, monitoring, and troubleshooting of national education management systems and in-house applications
- Support user training and onboarding on Ministry ICT tools and platforms
- Participate in data management, system backups, and basic reporting for education-related ICT services
- Gain hands-on exposure to the Ministry's critical ICT infrastructure and application ecosystem
- Collaborate with senior ICT officers on system maintenance and enhancement tasks
- Eager and fully prepared to contribute to systems development, maintenance of existing solutions, and building new scalable education applications at Headquarters level

ICT Lead, NGAZI Program

Remote (October 2024 - Present)

- Lead the ICT component of the NGAZI Program, an 8-week entrepreneurship execution and accountability program designed to help early-stage entrepreneurs develop and grow their businesses from concept to scalable ventures.
- Specialize in digital transformation, delivering solutions that enable participants to integrate technology into their operations, including digital marketing, automation, and tools for maintaining competitiveness in a digital landscape.
- Provide expert guidance, practical tools, and action plans focused on execution, ensuring entrepreneurs apply knowledge for tangible progress, compliance, growth, profitability, and job creation.

- Empower participants through structured frameworks that emphasize step-by-step business growth, drawing from the program's Swahili-inspired "ladder" approach to progressive stages.

Freelance Developer and Technical Writer
Remote (May 2020 – Present)

- Developed Single Page Applications (SPAs) for global clients using modern web technologies.
- Engaged in technical writing, producing articles, research proposals, and presentations for various projects.
- Mentored students in technical project reporting and article creation.

ICT Community Health Worker
Ministry of Health, Langata Sub-County (May 2018 – November 2019)

- Provided IT support and troubleshooting for health project staff, ensuring seamless use of digital tools for data collection and reporting.
- Conducted training sessions on the effective use of health informatics tools.
- Assisted with fieldwork, project implementation, and data management.

ICT Assistant (Program Attaché)
University of Nairobi (May 2017 – August 2017)

- Managed computer networks and provided hardware/software maintenance for students and staff.
- Played a key role in maintaining and updating the university's website.

EDUCATION

Bachelor of Science in Computer Science

Maasai Mara University (2014 – 2022)

CERTIFICATIONS & TRAINING

Cloud and Network Security Trainee

CISCO NETACAD (January 2025 – Present)

Certificate in Software Engineering

Moringa School (June 2023 – January 2024)
